

Foreword

It is our great pleasure to welcome you to the *2017 ACM ASIA Public-Key Cryptography Workshop – APKC’17*. Public key cryptography plays a central role in ensuring versatile security services for many applications. The aim of this workshop is to provide researchers with a platform for discussing recent advances in public key cryptography in relation to solving real-world security problems. This workshop solicits original contributions on every aspect of public key cryptography. The call for papers attracted submissions from various parts of the world and received 10 submissions. Through careful and thorough review process, the program committee accepted 5 papers based on their quality and novelty. We hope you will find this year’s program of APKC useful and valuable for research in the field of public key cryptography and its applications.
