ACKNOWLEDGMENTS

This study involved many people who in different ways identified themselves with the research and contributed in no small way to the final completion of the work. I would particularly like to thank the following:

Fernando, who first introduced me to the squatter communities of Cebu and Fr. Wein, S.V.D., who first gave me the idea of making a research among the squatters;

My family for the support and financial assistance they gave me throughout the study;

The Society of St. Columban who financed the whole fieldwork which turned out to be a considerable expense;

Dr. Resil B. Mojares and the Ford Foundation/Cebuano Studies Center Thesis Assistance Awards who presented me with a grant to complete this work at a time when my funds were almost absolutely exhausted;

Mrs. Zenaida Uy, Head of the Sociology-Anthropology Department, U.S.C. and my adviser during the study, for her guidance particularly during the early stages of the research and for her further suggestions and criticisms at other points in the study;

Mrs. Josephine Pelaez, Mr. Terence McGuire and Mrs. Margarita Cañete, the readers of the study, for their

suggestions in improving the work and particularly for some of the reading materials that they made available to me;

John McAndrew, Institute of Philippine Culture, for looking over the work and offering further suggestions on several occasions;

Fr. Joe Croghan, M.M., for reading the first phase of the study, making many suggestions and in countless other ways giving support and encouragement;

Mr. Bimbo Fernandez, who first gave me the idea of using Hadley Cantril's self-anchoring scale as an index of perceived mobility for the second phase of the study;

My brother Paddy and Fr. Armand Clement for their continual encouragement whether they were far away or close at hand;

My wife, Tessie, whose rapport with the squatter people often inspired them to be extremely frank and open and who also coordinated the fieldwork;

Perlita Damus, Flordeliza Amores, Pedrosa Mansing and Evelyn Acasio, students from Sudlon Agricultural College, who played a very big part in the interviewing;

Mr. Manuel Rusiana and family for very speedily typing out the final manuscript;

Narda Salinas from Tejero Compound and all the other squatter families whom we interviewed for trusting us much, for sharing their lives with us and for teaching us so many things. On behalf of all of us who took part in this research, I would like to conclude with the following few words to the people of Tejero:

"You have all been a great inspiration to each of us taking part in the fieldwork but it was you, Narda, who particularly opened our eyes and put before us many realities and insights which we would have otherwise never been able to see."

NCEL CLARKE
