PATHFINDER:

MANAGEMENT ACCOUNTING

Scope Note

Published financial statements are the most widely visible **products** of business accounting systems and the ones with which the public is most concerned, they represent only a small portion of all the accounting activities that support an organization. Most accounting data and most accounting reports are generated solely or mainly for the company's managers. Reports to **management** may be either summaries of past events, forecasts of the future, or a combination of the two. [Source: Encyclopedia Britannica Online]
